scale 1.1

SCALE FOR PROJECT AI-MODULE-1X0 (/PROJECTS/AI-MODULE-1X0)

Introduction

Please respect the following rules:

- Remain polite, courteous, respectful and constructive
throughout the evaluation process. The well-being of the community
depends on it.

- Identify with the person (or the group) evaluated the eventual
dysfunctions of the work. Take the time to discuss
and debate the problems you have identified.

- You must consider that there might be some difference in how your
peers might have understood the project's instructions and the
scope of its functionalities. Always keep an open mind and grade
him/her as honestly as possible. The pedagogy is valid only and
only if peer-evaluation is conducted seriously.

Guidelines

The preliminaries must be understood and then applied to each exercise.

Preliminaries

Simple preliminaries

The defense is done in the presence of the graded student. This is how everyone progresses: by interacting with others.

- No report: 0, the defense is over.
- As soon as an exercise is non-functional, the correction stops. You can of course continue the following exercises, but they will not be graded.

    ☑ Yes   ✕ No

Exercise

Data Visualisation

- Do the graphics match the subject?
- The individual should be able to explain what a heat map is and understand the significance of colors in relation to the target.

    ☑ Yes   ✕ No

Prediction

- The individual should be able to provide an explanation of what a Confusion Matrix is and understand the meanings of TP, TN, FN, and FP.
- The f1-score must be greater than 0.9

☑ Yes   ✕ No

Bonus

Evaluate the bonus part if, and only if, the mandatory part has been entirely and perfectly done. In case all the mandatory points were not passed during the defense, bonus points must be totally ignored.

Bonus

The person has redone the functions without the libraries,
the confusion matrix and classification report is obligatory, for the rest you can look together for the notation.

We remind you that this part is not mandatory and that if the person does not validate this point,
it will not be a big deal at all!

☑ Yes   ✕ No

Ratings

Don't forget to check the flag corresponding to the defense

✔ Ok   ★ Outstanding project

Conclusion

Leave a comment on this evaluation
